

Aashish Kumar

MERN Stack Full Stack Developer

Mohali, Punjab, India | +91-9896595913 | aashishvermaonline@gmail.com

PROFESSIONAL SUMMARY

MERN Stack Full Stack Developer with 4+ years of experience building scalable, secure web applications with MongoDB, Express.js, React.js and Node.js, along with Next.js, TypeScript, PHP (Laravel) and MySQL. At Seraphic Infosolutions Pvt. Ltd., currently building Tourneyfest end-to-end — a tournament, team and sports management platform for colleges. Experienced in REST API design, OAuth 2.0 authentication, role-based access control (RBAC), MongoDB aggregation, AWS S3 and payment gateway integrations. Skilled in AI-assisted development with Claude Code and OpenAI Codex to deliver clean, reliable features faster.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, Java, SQL, HTML5, CSS3

Frontend: React.js (Hooks), Next.js (App Router), Angular, Zustand, React Router, Axios, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, Laravel, CodeIgniter, Mongoose (ODM), Eloquent ORM, MVC Architecture, Middleware, File Uploads (Multer), Logging (Winston)

Databases: MongoDB (Aggregation Pipelines, Indexing), MySQL

Authentication & Security: OAuth 2.0 (Google Sign-In, Passport.js), bcrypt, Role-Based Access Control (RBAC), Google reCAPTCHA

Cloud & Integrations: AWS S3, Payment Gateway Integration, Third-Party API Integration, Nodemailer, Deep Linking (Android App Links, iOS Universal Links)

AI Tools: Claude Code (Anthropic), OpenAI Codex, ChatGPT, AI-Assisted Development, Prompt Engineering

Tools & Practices: Git, GitHub, Postman, Vite, npm, CI/CD, TDD, Data Structures, OOPs

PROFESSIONAL EXPERIENCE

MERN Stack Full Stack Developer

Seraphic Infosolutions Pvt. Ltd.

Dec 2025 – Present

Mohali, Punjab

- Use Claude Code and OpenAI Codex for AI-assisted development, debugging and code reviews.

Project: Tourneyfest — Tournament, Team & Sports Management Platform

Role: End-to-End Full Stack Developer | **Tech Stack:** React.js, TypeScript, Node.js, Express.js, MongoDB, Next.js

- Built the platform from scratch: React.js admin dashboard and Node.js/Express.js REST API (180+ endpoints) on MongoDB, also powering the Next.js public website.
- Implemented Google OAuth 2.0 login with role-based access control (RBAC) for admins, coaches and players.
- Developed fixture generation (Knockout, League, Group + Knockout) and a live scoring engine for 10 sports with standings and leaderboards.
- Co-developed the tournament registration and approval workflow with AWS S3 uploads and email notifications.

Project: Equicare — Horse Feed & Stable Management System

Role: Full Stack Developer | **Tech Stack:** Laravel (PHP), MySQL, Next.js, TypeScript

- Built the Equine Directory module (Laravel, MySQL, REST APIs) and enhanced the calendar and My Stable APIs.
- Implemented invite deep links for the iOS/Android apps and improved the Add Feed flow in the Next.js web app.

Software Engineer

SmartInfo Care Solutions

Jul 2023 – Nov 2025

- Developed Legendetell, a Laravel web application that automates services through third-party API integrations.
- Built First Class Cleaning Service, a cleaning-service booking platform using Laravel and Angular, with user authentication and payment gateway integration.
- Upgraded an application from Laravel 5.8 to Laravel 9.0, refactoring deprecated code and updating dependencies.
- Designed and developed REST APIs for the CourtSmith and Marshing-Star applications.
- Implemented third-party API and payment gateway integrations across client projects.

Junior Web Developer

Jun 2022 – Jun 2023

Kadam Technologies

- Developed the admin panel of an Inventory Management System in Laravel to manage goods stock, covering Buyer, Vendor, Purchase, Tax Invoice and Dashboard modules.
- Built Healer Management System, a self-driven internal project using Laravel (backend) and React.js (frontend) for slot booking, tax invoices and payments.
- Added new features and fixed bugs across existing modules.

PERSONAL PROJECT

Simple Inventory System

Laravel

- Built an inventory application to manage items and generate tax invoices and credit notes.

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Guru Jambheshwar University of Science & Technology (GJUST), Hisar, Haryana

Bachelor of Computer Applications (BCA)

2018 – 2021

Guru Jambheshwar University of Science & Technology (GJUST), Hisar, Haryana

Senior Secondary (Class XII), CBSE

2017

Apex Public School, Fatehabad, Haryana

CERTIFICATIONS & TRAINING

- SQL (Basic) Certificate — HackerRank (Nov 2022)
- C & C++ Programming Training — 8 Weeks (Jun 2020)
- National Service Scheme (NSS) Certificate (2020)
